

"The Universe has crashed again"

*"Try switching it off, then
back on again." m.m*

*The 'Old Man in the Sky'
has few options in this crisis.*

*Yet the understanding of 'God'
as the creative energy potential
in every living thrust -*

- in tree, plant, fish, bird, beast,
or humble human being-
is a reality we can all realise.*

*Humans must acknowledge
that we are all inter-related kin,
earth's commoners alike.*

*Learning from the rest of nature,
we can then take the lead,
in recovering from the crash.*
